PROFILE

A detail-oriented and results-driven Backend Developer with hands-on experience in building scalable microservices and maintaining enterprise-level banking applications. Proficient in Java (Spring Boot) and PHP (Laravel, Phalcon), with a strong track record of optimizing system performance using PostgreSQL. Proven ability to monitor server-side operations, troubleshoot critical production issues, and deliver secure, high-availability software solutions in fast-paced professional environments.

PROFESSIONAL EXPERIENCE

Java Developer – PT Reka Cipta Solusi	August 2025 – Present
- Developed and maintained robust microservices architectures for a mobile banking application using Java and Spring Boot, ensuring secure and seamless financial transactions. - Conducted continuous server-side monitoring and provided technical support in a production environment, effectively troubleshooting complex banking software issues to minimize system downtime. - Managed and optimized database operations using PostgreSQL to support high-availability banking services. Technologies: Java, Spring Boot, Microservices architecture, Linux Server Administration.	
Backend Developer Intern – PT Kerjaku Inti Sejahtera	Jun 2024 – Oct 2024
- Engineered and developed a total of 90 RESTful APIs (65 for web, 25 for mobile) for a comprehensive Point of Sale (POS) system. - Improved system performance by designing a scalable architecture with Redis caching, successfully reducing average API response times by an estimated 30%. - Implemented robust security layers using JWT and OTP tokens and established a comprehensive logging system that decreased troubleshooting time for critical incidents. Technologies: PHP (Phalcon), PostgreSQL, Redis, Minio.	
Programmer – PT Inti Optima Teknologi	May 2022 – Jul 2022
- Maintained and enhanced a critical employee management system serving over 5,000 personnel nationwide for the National Narcotics Board (BNN). - Successfully developed and integrated 3 new key features for employee transfers, aligning with existing system architecture and ensuring high scalability. - Collaborated in a team of 3 developers to identify and resolve over 50 outstanding bugs, significantly improving system stability and user satisfaction. Technologies: PHP, PostgreSQL.	
Frontend Developer Intern – Jagad Creative Nusantara	Oct 2020 – Dec 2020
- Developed a fully responsive company profile website from scratch for a national government body (BKKBN), ensuring a seamless user experience across all major browsers. - Implemented Progressive Web App (PWA) features which achieved a Lighthouse performance score of 90+, enabling offline access and faster load times. - Managed project timelines effectively and collaborated with the project manager to deliver the final product one week ahead of the 2-month deadline. Technologies: PHP (Laravel), Bootstrap.	

AWARDS & ACHIEVEMENTS

Finalist, 37th National Student Scientific Week (PIMNAS) 2024
- Selected as one of only 84 teams in the Community Service category to compete as a finalist, advancing from an initial pool of over 5,000 funded projects nationwide. - Presented our project at Indonesia's most prestigious student scientific competition, evaluated on innovation, technical execution, and societal impact. Issuer: National Achievement Center (Puspresnas), Ministry of Education, Culture, Research, and Technology.
Funded, Student Creativity Program (PKM) Grant 2024

- Our project was selected as one of only 51 proposals in the Community Service (PM) category to receive national funding, chosen from submissions across 401 vocational institutions.
- This competitive grant enabled the development of our "SIMPEMAS" mobile application, which successfully addressed a real-world community need.
- **Issuer:** Directorate General of Higher Education (Belmawa), Ministry of Education, Culture, Research, and Technology.

PROJECT EXPERIENCE

Jam’iyyah Management Application – React, Laravel, Node.js **Jan 2025 – Jul 2025**

- Engineered a full-stack web platform to manage and centralize data for over 600 members across 33 community groups (pimpinan jamaah), successfully digitizing a complex administrative process.
- Developed a key feature to streamline financial management, automating the collection of member dues and providing summary financial reports for each group leader.
- Innovated by integrating a dynamic WhatsApp information service using Node.js, allowing members to check dues status and receive announcements automatically.

SIMPEMAS Mobile App – Flutter, Firebase **Jan 2024 – Jul 2024**

- Developed a mobile app using Flutter and Firebase that dramatically reduced the community service proposal process from nearly 2 weeks to just 3-5 days.
- Enabled village administrators to manage and distribute activities effectively, ensuring all village areas benefited and that 90-95% of community needs were easily accessible.
- Implemented key features for stakeholder scheduling and community feedback, culminating in the project securing national PKM funding and advancing as a Finalist at PIMNAS 2024.

Power Plant Monitoring Application – VueJS **Oct 2023 – Dec 2023**

- Contributed as a Frontend Developer for a critical ICON+ (PLN) project, responsible for building the user interface for a national power plant monitoring system.
- Translated complex UI/UX designs into responsive and interactive web components using Vue.js, ensuring high fidelity to the original design.
- Integrated over 20 unique REST API endpoints from the backend team to accurately visualize real-time operational data on dynamic dashboards.

Student Leave Permission System – React, Express.js **Sep 2023 – Dec 2023**

- Co-developed a web application to automate the leave request workflow for approximately 240 students across 8 classes and 42 lecturers.
- Built the backend API using Express.js to handle all core functionalities, including CRUD for users, request processing logic, and a rekapitulation dashboard for admins.
- Engineered an automated email notification system to inform students, parents, and lecturers of request statuses, leading to the project winning 3rd place in the JTK Expo.

EDUCATION

Politeknik Negeri Bandung – Bandung, Indonesia **2022 – 2025**

Associate Degree in Informatics Engineering - GPA: 3.52

- Relevant Courses: Data Structures & Algorithms, Software Design, Mobile App Development, Project Management, Object-Oriented Programming

CERTIFICATIONS

- Junior Back End Spring Boot Developer – ArutalaLab 2025
- TOEIC Score: 685 2025
- Employability Skills – Wadhwani Foundation 2024
- Junior Web Developer – Badan Nasional Sertifikasi Profesi (BNSP) 2021

TECHICAL SKILLS

- **Languages:** Dart, JavaScript, PHP, Java, SQL
- **Frameworks:** Flutter, Laravel, VueJS, Phalcon, ReactJS, ExpressJS, SpringBoot
- **Databases:** PostgreSQL, MySQL
- **Tools:** Git, Redis, Postman, JWT, DBeaver, Firebase, Linux Server Administration, AI Prompt Engineering
- **Dev Methodologies:** Agile/Scrum
